Q.1 In the following series, only one letter-cluster is incorrect. Select the INCORRECT letter-cluster.

RTM PRK NPJ LNG JLE HJC

- Ans
1. JLE
  2. HJC
  3. NPJ
  4. LNG

Question ID : 441009840861  
Option 1 ID : 4410093316514  
Option 2 ID : 4410093316515  
Option 3 ID : 4410093316512  
Option 4 ID : 4410093316513

Q.2 In the following number-pairs, the second number is obtained by applying certain mathematical operation(s) to the first number. Which numbers should replace X and Y so that the pattern followed by the two numbers on the left side of :: is same as that on the right side of :: ?

(NOTE: Operations should be performed on the whole numbers, without breaking down the numbers into their constituent digits. E.g. 13 – Operations on 13 such as adding to/subtracting from/multiplying with 13 can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed.)

X : 42 :: 10 : Y

- Ans
1. X = 11; Y = 115
  2. X = 8; Y = 70
  3. X = 9; Y = 75
  4. X = 7; Y = 90

**Q.3** Two sets of numbers are given below. In each set of numbers, certain mathematical operation(s) on the first number result(s) in the second number. Similarly, certain mathematical operation(s) on the second number result(s) in the third number and so on. Which of the given options follows the same set of operations as in the given sets? (NOTE: Operations should be performed on the whole numbers, without breaking down the numbers into their constituent digits. E.g. 13 – Operations on 13 such as adding to/subtracting from/multiplying with 13 can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed.)

2 – 8 – 32 – 37  
3 – 27 – 108 – 113318

- Ans
- 1. 5 – 225 – 445 – 435
  - 2. 6 – 216 – 864 – 869
  - 3. 2 – 4 – 8 – 24
  - 4. 4 – 64 – 128 – 132

**Comprehension:**

Read the following passage carefully and answer the questions that follow.

One of the most serious worldwide concerns of the twenty-first century is terrorism, which is defined as the illegal use of force and intimidation, particularly against civilians. In contrast to traditional warfare, terrorism uses fear and uncertainty to destabilise nations and sway political outcomes. To enlist new members and defend their acts, terrorist organisations frequently take use of political, religious, or ideological issues. Terrorism has changed throughout time, moving from small-scale acts to intricate global operations that are frequently coordinated online.

Cyberterrorism has become more well-known in recent years, the internet is utilised for sensitive data theft and disruption in addition to recruiting and propaganda. In response, governments everywhere have implemented counterterrorism measures, ranging from military interventions and policy changes to monitoring systems and intelligence-sharing partnerships. But fighting terrorism involves more than just using force. It is equally important to address underlying issues like political oppression, social estrangement, and poverty.

Finding a balance between civil freedom and national security is the difficult part. Racial profiling and overzealous surveillance can backfire, alienating communities and bolstering radical narratives. As a result, counterterrorism tactics need to be sophisticated, inclusive, and internationally coordinated. Societies may only then hope to reduce the threat while maintaining the values they are trying to safeguard.

Another important factor in the fight against terrorism is education. Early exposure to critical thinking, tolerance, and intercultural understanding can help protect people against radical views. It is possible to lessen the appeal of radical groups and promote more resilient, cohesive communities by empowering young people via education and providing chances for positive civic engagement.

निम्नलिखित गद्यांश के आधार पर प्रश्नों के उत्तर दें।

संत रैदास की विचारधारा आज भी प्रचलित सामाजिक अंतर्विरोधों एवं समस्याओं का समाधान निकालने में एक सीमा तक सहयोग दे सकती है। उनकी वाणी में दीन हीन और शोषितों के प्रति एक विकल पीड़ा, अपमान के विरुद्ध समाधान में प्रतिपल घुटन तथा समस्याओं के प्रति एक जागरूक दृष्टि थी तथा वे वह यह भली प्रकार जानते थे कि पुरातनता से किस प्रकार ग्रहण किया जाये, परंपरा को किस स्थान तक सुरक्षित रखा जाये और नवीन परिस्थितियों के अनुरूप किस प्रकार मार्ग बनाया जाए। उनके काव्य में वर्ण-व्यवस्था से उत्पन्न भेदभाव तथा कर्मकांड के प्रति गहरा क्षोभ अभिव्यक्त हुआ है। उन्होंने तमाम तरह का वैषम्य और दुख-दर्द स्वयं भोगा था इसीलिए उनकी अभिव्यक्ति में सत्य और अनुभूति का बल है। सामाजिक जीवन में हर प्रकार के द्वैत को अस्वीकार करने वाले कवि के अनुसार भक्ति का धरातल प्रेम का धरातल है। उन्होंने अपने आचरण तथा व्यवहार से यह प्रमाणित कर दिया है कि मनुष्य अपने जन्म तथा व्यवसाय के आधार पर महान नहीं होता है। विचारों की श्रेष्ठता, समाज के हित की भावना से प्रेरित कार्य तथा सद्व्यवहार जैसे गुण ही मनुष्य को महान बनाने में सहायक होते हैं। उनका जीवन और साहित्य अपने युग का ही नहीं, सदा-सर्वदा के लिए एक महान विचारक, चिंतक तथा समाज सुधार के रूप में आज की मनुष्यता के विकास के लिए मार्गदर्शक हैं। वर्तमान समय में समाज में व्याप्त विसंगतियों को देखते हुए कहा जा सकता है कि रैदास के साहित्य का पुनर्पाठ किया जाना चाहिए और शोध के माध्यम से अनछुए पहलुओं को उजागर किया जाना चाहिए।

**Q.9 Identify how the ideas are organised in the following passage.**

Crack and cocaine have three similar effects on the human body. Although crack is heat resistant and cocaine is destroyed by heat, both cause hypertension. Also, crack and cocaine bring about physiological and psychological damage, depending on pre-existing conditions and the extent of drug use. For example, hallucination, psychosis, paranoia and aggressive behaviour may occur, and an overdose of either may cause cardiac collapse or convulsion. Finally, use of both drugs can lead to addiction. Despite crack and cocaine's similarities, they have three major differences. First, although crack and cocaine are derived from the coca plant, they differ in form. Crack has the form of flakes whereas cocaine is found in the form of powder, which can be dissolved. Furthermore, both crack and cocaine contain cocaine, but in various percentages: crack contains as much as 90 per cent pure cocaine whereas cocaine contains from 15 to 25 per cent pure cocaine. Another major difference is how they enter the body. For example, crack is smoked in a pipe or cigarette. It enters the body by the lungs into the bloodstream. Cocaine, on the other hand, is inhaled as a powder or is injected if dissolved. It enters the body via the nasal mucosa into the bloodstream or, if injected, directly via the bloodstream.

**Q.16** Read the following passage and identify how the argument is developed about the legalisation of gambling.

The most evident argument as to why the legalisation of gambling has been so widespread is the enormous revenue it generates for governments. With an enterprise that sums up over fifty billion a year, many governments view gambling as a smart way of bringing in money. In a study by Vaillancourt and Roy, the authors stated that the ban on gambling would result in a tax increase between ten and fifteen percent to replace gambling revenues.

Given the statistic that 82% of households took part in some form of gambling, taking this activity away followed by increasing taxes would not reverberate well with the public. Such a high proportion of people gambling illustrates how the attractiveness of legalised gambling can entice people to cities, therefore giving a boost to the city's tourism industry, one more sector that welcomes this source of revenue.

Cities, where gambling is permitted, are considered to be great tourist attractions. When a casino opens, an influx of money enters the economy because of the increased number of tourists. Las Vegas is a testimony to how tourists' dollars are capable of transforming a barren desert into a highly desired and preferred destination. This increase in the number of tourists results in an upsurge in spending in the community, thus providing opportunities for employment and a boost to the hospitality sector. One of the motives why many people have become keen to try to gamble is because the majority of people no longer see the act as a sinful and dirty vice conjured up by the corrupt underworld.

The legalisation of gambling has permitted the state to take control away from the criminal underworld. This has weakened the influence of swindlers, forgers, and thieves, all of whom use gambling as an arena for their work. Although placing bets illegally through bookkeepers continues to exist, it is essential to realise that earlier to its legalisation, those in control of gambling entirely controlled the underworld.

Q.18 Read the passage and answer the following question.

My most valuable possession is an old, slightly warped blond guitar—the first instrument I taught myself how to play. It's nothing fancy, just a Madeira folk guitar, all scuffed and scratched and fingerprinted. At the top is a bramble of copper-wound strings, each one hooked through the eye of a silver tuning key. The strings are stretched down a long, slim neck, its frets tarnished, the wood worn by years of fingers pressing chords and picking notes. The body of the Madeira is shaped like an enormous yellow pear, one that was slightly damaged in shipping. The blond wood has been chipped and gouged to gray, particularly where the pick guard fell off years ago. No, it's not a beautiful instrument, but it still lets me make music, and for that I will always treasure it.

Which of the following are the words describing the wear and tear of the guitar?

- Ans
1. A long slim neck
  2. Bramble of copper-wound strings
  3. Scuffed and scratched and fingerprinted
  4. Shaped like an enormous yellow pear

Q.20 How did Martin Luther King Jr. persuade the audience to align with his idea of freedom in the following extract from his speech? Select from the options what is predominantly used.

I still have a dream. It is a dream deeply rooted in the American dream.  
I have a dream that one day this nation will rise up and live out the true meaning of its creed.  
We hold these truths to be self-evident that all men are created equal.  
I have a dream that one day out in the red hills of Georgia the sons of former slaves and the sons of former slaveowners will be able to sit down together at the table of brotherhood.  
I have a dream that one day even the state of Mississippi, a state sweltering with the heat of oppression, will be transformed into an oasis of freedom and justice.  
I have a dream that my four little children will one day live in a nation where they will not be judged by the color of their skin but by their character.  
I have a dream today.  
I have a dream that one day down in Alabama, with its vicious racists, with its governor having his lips dripping with the words of interposition and nullification; that one day right down in Alabama little black boys and black girls will be able to join hands with little white boys and white girls as sisters and brothers.  
I have a dream today.  
I have a dream that one day every valley shall be engulfed, every hill shall be exalted and every mountain shall be made low, the rough places will be made plains and the crooked places will be made straight and the glory of the Lord shall be revealed and all flesh shall see it together.

Cryptocurrency is a digital or virtual form of currency that uses cryptographic technology for secure transactions. Unlike traditional currencies issued by governments, cryptocurrencies operate on decentralised networks based on blockchain technology. Bitcoin, introduced in 2009, was the first cryptocurrency and remains the most popular. Over the years, various cryptocurrencies like Ethereum, Ripple and Litecoin have emerged, each serving different purposes.

One of the key advantages of cryptocurrency is its decentralisation, which removes the need for intermediaries like banks. Transactions are faster, cheaper and more transparent. However, this digital currency also comes with risks. Its value is highly volatile, making it an unpredictable investment. Additionally, since transactions are largely anonymous, cryptocurrencies have been associated with illegal activities. Governments worldwide are struggling to regulate them, balancing innovation with financial security.

Despite these challenges, the adoption of cryptocurrency is increasing. Many businesses now accept digital payments, and financial institutions are exploring blockchain technology for secure transactions. While some see cryptocurrency as the future of finance, others remain sceptical due to its volatility and regulatory concerns. Whether it becomes mainstream or remains a niche asset, cryptocurrency has undeniably revolutionised the financial world.

No one who had ever seen Catherine Morland in her infancy would have supposed her born to be a heroine. Her situation in life, the character of her father and mother, her own person and disposition, were all equally against her. Her father was a clergyman, without being neglected, or poor, and a very respectable man, though his name was Richard and he had never been handsome. He had a considerable independence besides two good livings, and he was not in the least addicted to locking up his daughters. Her mother was a woman of useful plain sense, with a good temper, and what is more remarkable, with a good constitution. She had three sons before Catherine was born: and instead of dying in bringing the latter into the world, as anybody might expect, she still lived on- lived to have six children more- to see them growing up around her, and to enjoy excellent health herself. Catherine had a thin awkward figure, a sallow skin without colour, dark lank hair, and strong features- so much for her person; and not less unpropitious for heroism seemed her mind. She was fond of all boys' plays, and greatly preferred cricket not merely to dolls, but to more heroic enjoyments of infancy, nursing a dormouse, feeding a canary-bird, or watering a rose-bush.

Read the following passage carefully and answer the questions that follow.

Innovation is celebrated as the foundation of development in contemporary civilisation. Governments spend money on research and development, companies cultivate cultures that value unconventional thinking, and people are urged to 'think outside the box'. Ironically, though, the organisations and systems that purport to support innovation frequently oppose it. This opposition isn't always obvious. It is ingrained in stakeholders' fear of risk, established systems' inertia, and their desire for predictability. Even when procedures are out of date, institutions have a tendency to valorise and value prior achievements. Because of this, new ideas are often suppressed under the pretext of tradition, etiquette, or policy. There are many examples throughout history. The Church denounced Galileo's heliocentric theory, which is today a cornerstone of astronomy. In obstetric clinics, Semmelweis, a Hungarian doctor, found that handwashing with chlorinated lime solutions significantly decreased mortality. In spite of overwhelming evidence, the medical establishment was hesitant to acknowledge that physicians were the source of illnesses, but his methods served as the basis for contemporary antiseptic techniques. Alan Turing laid the foundation for artificial intelligence by speculating that machines could mimic human intelligence. His concepts were unpopular and far ahead of their time. However, Turing is now regarded as a father of computer science.

Nowadays, before being proven right, whistleblowers who reveal systemic problems are frequently shunned. These instances highlight a persistent conflict between institutional orthodoxy and innovation.

Therefore, true innovation demands a lot more than just imagination; it also calls for timing, resilience, and frequently a readiness to challenge the very structures one works within. The paradox is that although society demands change, it is equally afraid of what it will bring.

**SubQuestion No : 16**

**Q.16** What deeper meaning does the author express using instances from both the past and present?

**Ans**

1. Innovations encounter resistance before being accepted
2. Science and religion cannot coexist
3. Humanity has always profited from technological innovation
4. Innovators need to obtain government approval

Even when procedures are out of date, institutions have a tendency to valorise and value prior achievements. Because of this, new ideas are often suppressed under the pretext of tradition, etiquette, or policy. There are many examples throughout history. The Church denounced Galileo's heliocentric theory, which is today a cornerstone of astronomy. In obstetric clinics, Semmelweis, a Hungarian doctor, found that handwashing with chlorinated lime solutions significantly decreased mortality. In spite of overwhelming evidence, the medical establishment was hesitant to acknowledge that physicians were the source of illnesses, but his methods served as the basis for contemporary antiseptic techniques. Alan Turing laid the foundation for artificial intelligence by speculating that machines could mimic human intelligence. His concepts were unpopular and far ahead of their time. However, Turing is now regarded as a father of computer science. Nowadays, before being proven right, whistleblowers who reveal systemic problems are frequently shunned. These instances highlight a persistent conflict between institutional orthodoxy and innovation. Therefore, true innovation demands a lot more than just imagination; it also calls for timing, resilience, and frequently a readiness to challenge the very structures one works within. The paradox is that although society demands change, it is equally afraid of what it will bring.

**Comprehension:**

Read the following passage carefully and answer the questions that follow.

Innovation is celebrated as the foundation of development in contemporary civilisation. Governments spend money on research and development, companies cultivate cultures that value unconventional thinking, and people are urged to 'think outside the box'. Ironically, though, the organisations and systems that purport to support innovation frequently oppose it. This opposition isn't always obvious. It is ingrained in stakeholders' fear of risk, established systems' inertia, and their desire for predictability.
